NMSDC National Minority Supplier Development Council

MINORITY BUSINESSES ECONOMIC IMPACT REPORT 2019

National Minority Supplier Development Council

Advancing Business Connections that Count

Chartered in 1972, the National Minority Supplier Development Council has been the nation's most dynamic force in developing successful relationships between America's top corporations and minority companies for nearly 50 years. These relationships result in billions in revenues every year for its certified businesses and support over half a million jobs annually at these companies.

"The numbers seal the deal: economic impact may be NMSDC's most convincing business tool in making the case for minority supplier development. Nothing better demonstrates the benefit to all stakeholders than a positive statement about the economic impact of supplier diversity. In the corporate world; it promotes innovation, drives competitive advantage, and confirms bottom-line value. In minority communities, it grows the stability of daily life, nourishes ambition and vision, and builds ownership in the American economy of the future."

> Adrienne Trimble President, NMSDC

Why we do what we do

For nearly 50 years, the NMSDC, our corporate members, and our certified MBEs have collectively made amazing strides in developing and growing minority businesses and their relationships with corporations and government buying organizations. Our certified suppliers had over \$214 billion in sales last year – the most ever. The number of MBEs that create jobs has continued to grow, increasing from 908,800 in 2012 to 1,054,575 in 2016.² These MBEs collectively generate over \$1.26 trillion in revenues² and have been critical contributors to US's economic prosperity over the past decade.

NMSDC assists minority businesses of all ethnicities to bring economic progress in their communities. Nonetheless, much remains to be done. Today, white families had six times the median wealth of black and Hispanic families. The median income for black and Hispanic families is 60% of that of white families.¹

Entrepreneurship remains one of the most promising paths to upward mobility for minorities. And that is why NMSDC continues to work on behalf of minority businesses to drive economic growth and impact through wealth and job creation by creating an environment where minority businesses have the opportunities they need to flourish. Forging business relationships

Note: Jobs at MBEs are shown in the MBE's headquarters state.

The impact of our certified MBEs extends beyond their firms by supporting jobs at other businesses.

Certified MBEs create an immediate impact through the employees they hire. However, businesses today are highly integrated, with every business relying on other businesses to create their products and services. As a result, MBEs support jobs at not only their own companies, but also at the other businesses they utilize in the course of running their operations. These suppliers to MBEs further employ other businesses, creating a chain of economic activity through the entire supply chain.

In addition, the employees of MBEs generate additional economic activity at the businesses in their communities. These employees spend a portion of earnings for expenses such as groceries, education, health, entertainment, housing, etc. This spending supports jobs at these businesses - teachers, doctors, contractors, etc.

Combined, these three channels of activity multiplies the impact generated by NMSDC certified MBEs.

Impact Channels

Purchases from NMSDC certified MBEs trigger a ripple effect of economic activity through their supply chain.

Direct Impact at MBEs

Impact at MBEs who employ people to support their sales.

Indirect Impact in MBEs' supply chain

Lower tier suppliers who also employ people and hire other suppliers.

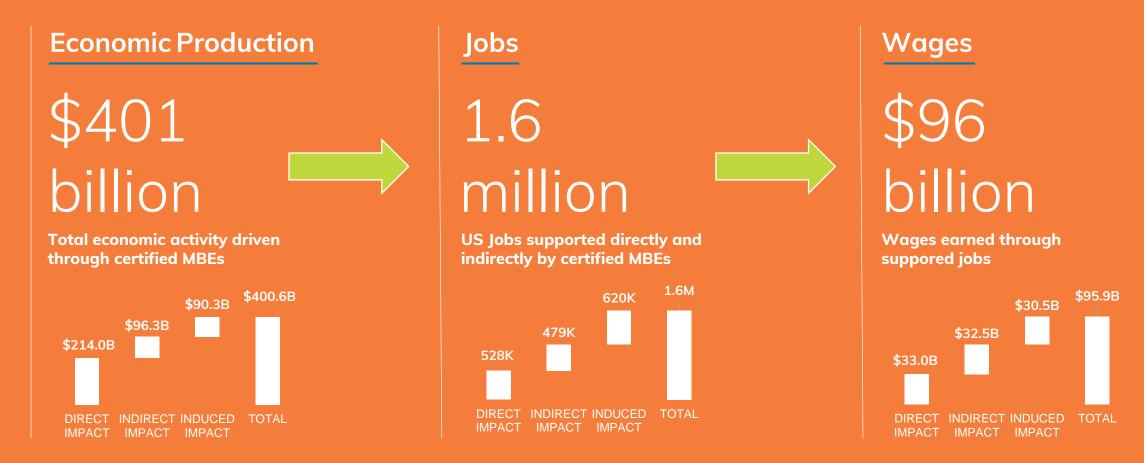

Induced Impact through employee purchases

Employee spending generates sales and jobs at business in their communities.

The total economic impact through our certified MBEs

The activities of NMSDC certified MBEs have a multiplier effect on the economy. The cumulative impact of their direct, indirect, and induced impacts creates over \$400 billion in economic activity in the US and supports over 1.6 million jobs.

Appendix

Economic Impacts Explained

Economic impact modeling is a standard tool used to quantify the economic contribution of an investment or company. This modeling uses an "Input-Output" economic model to estimate the number of times each dollar of "input" or direct spending, cycles through the economy in terms of "indirect and induced output" or additional spending, personal income, and employment.¹

There are several Input-Output models used by economists to estimate multiplier effects. supplier.io employed the IMPLAN input-output model in developing estimates of spending, income and employment impacts. This model, initially developed by the U.S. Department of Agriculture, examines inter-industry relationships in local, regional, and national economies.

An Input-Output model uses a matrix representation of a nation's interconnected economy to calculate the effect of changes in spending by consumers, by an industry, or by others, on other industries and the entire economy. This matrix representation and the related Input-Output tables ultimately measure "multiplier effects" of an industry by tracing the effects of its inter-industry transactions – that is the number value of goods and services that are needed (inputs) to produce each dollar of output for the individual sector being studied. In essence, an Input-Output model is a table which shows who buys what from whom in the economy.¹

This report was created by **supplier.io** and is based on an analysis of data provided by NMSDC and using IMPLAN's Input-output multipliers.

supplier.io

supplier.io is redefining supplier diversity solutions. By providing innovative and solutions, we help our customers run manage and grow their supplier diversity programs effectively and strategically. Supplier Diversity Managers rely on our data, insights, and analytics. To learn more, visit <u>https://supplier.io</u>.
